

PRABHA L

Final Year B.E. CSE – AI & ML

Prabha.l@mce.edu.in | +91 9363211044 | Chennai, India | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Final year B.E. CSE (AI & ML) student with a CGPA of 8.49, hands-on experience from two industry internships, and three AI-based project builds. Proficient in Python, Flask, and cloud deployment (AWS, Docker, Kubernetes). Building full stack skills with Python backend and React frontend. Seeking for opportunity where I can contribute to real-world web development and AI-integrated applications.

TECHNICAL SKILLS

Languages	: Python, HTML, CSS, SQL
Frameworks	: Flask (backend)
Cloud & DevOps	: AWS, Docker, Jenkins, CI/CD Pipelines, Git & GitHub
AI / ML	: Scikit-learn, Data Preprocessing, Model Training & Evaluation
Tools	: VS Code, Postman, GitHub

INTERNSHIP EXPERIENCE

DevOps & Cloud Intern — DLK Technologies, Vadapalani *June – July 2025*

- Deployed Flask web applications on AWS using Docker and Kubernetes for container orchestration.
- Set up CI/CD pipelines using Jenkins and GitHub to automate build, test, and deployment workflows.
- Managed version control and cloud infrastructure in a real-world team environment.

Machine Learning Intern — SkillCraft Technology *July – August 2025*

- Built and evaluated Python ML models (scikit-learn) for classification tasks with real datasets.
- Performed data preprocessing — cleaning, normalization, and feature engineering — end to end.

PROJECTS

AI Flood & Waterlogging Early Warning System | *Python, Flask, Scikit-learn, HTML/CSS*

- Built an ML-powered Flask web app predicting flood risk from rainfall and sensor inputs with a real-time alert dashboard.
- Trained a classification model and connected it via REST API to an HTML/CSS frontend — full stack, end to end.

Weather Impact Analysis – Crop Monitoring & Pest Management | *Python, Flask, Data Analysis*

- Led a team to build a system correlating weather patterns with crop health and pest outbreak risk.
- Developed Python data pipelines and presented results at a department technical event; recognized for practical impact.

Rock-Fall Prediction & Early Warning System | *Python, ML, Sensor Data*

- Designed a predictive model using simulated geological sensor data with threshold-based automated alert triggers.

EDUCATION

B.E. CSE (AI & ML Specialization) — Meenakshi College of Engineering	CGPA: 8.49	<i>2023 – 2027</i>
Higher Secondary (12th) — Govt. Girls Higher Secondary School, Ashok Nagar	78%	<i>Completed</i>
Secondary School (10th) — Annai Theresa Matriculation School, M.G.R. Nagar	100%	<i>Completed</i>

LEADERSHIP & ACTIVITIES

- Team Lead — Weather Impact Analysis project; managed research, task distribution, and technical presentation at college event.
- Member of Department Club; co-ordinated technical workshops and department-level events.
